- Python, Java, Git
- PHP
- CSS, HTML, JS
- Teamwork
- Leadership
- Problem Solving

LANGUAGES

- Portuguese: Native
- English: Fluent
- French: Basic
- Spanish: Basic

PROFILE SUMMARY

Hi, I'm Luis currently a University student in Software Engineer at the University of Trás-os-Montes e Alto Douro, nearing the completion of my degree.

Passionate about technology, design, and problem-solving, I'm always looking for ways to create efficient and innovative solutions. With a particular interest in bridging the gap between backend and frontend development, I strive to understand both areas deeply, ensuring systems are robust and provide a seamless, intuitive user experience.

Continuously seeking new knowledge and challenges, I'm open to opportunities that allow me to grow professionally and apply my skills to real-world projects.

WORK EXPERIENCE

Nuno Electrico LDA

2021 - PRESENT

Systems Administrator

- On the weekends I have been working since I started my degree in a family business where as a Network and Smart Home Technician, I have been involved in various projects, including the installation and configuration of home automation systems, network infrastructure, and security systems.

Consultório Dr Ernani

2020 - 2021

Medical Clinic Rebranding

- Rebranding of a Private Medical Clinic (Consultório Dr Ernani) where I created its website, pages, and designs in general.

ACHIEVEMENTS

DigiEduHack - AuBay

2024 - 2024

Winner of Hackathon - "Enhancing the User Experience of Aubays e-Learning Platform"
